AX SERIES CONTINUOUS INKJET PRINTING

Speed, accuracy and the ability to perform in tough and varied environments give the latest Domino Ax-Series continuous inkjet printers unique technological advantages. *Our revolutionary i-Pulse system allows you to rapidly print high-contrast, durable messages and multiple lines at high speeds.*

Our i-Pulse inks adhere to a wide range of substrates even after some of the toughest post-print processes. **Domino's high-quality continuous inkjet printers and laser coders deliver glass marking at speed with reliability. Domino printers not only meet the tough demands of glass bottle coding processes in the beverage industry, they bring ease-of-operation and high-performance too.**

G SERIES THERMAL INKJET PRINTERS

Designed for use on even the most challenging substrates, our intelligent, high resolution modular G-Series thermal inkjet printers are simple to install, maintain and use on our production line. Our TIJ i-Tech range is able to produce high quality codes even on the fastest production lines. With the option of either 2 or 4 print heads, depending on the model you choose, print height can be adjusted for multiple lines of print at speeds of up to 300m/min.

CO2 LASER

Small yet powerful and versatile, Domino Printing's D-Series i-Tech range of CO2 laser marking machines deliver flexible, high speed, high quality coding across a wide variety of materials, with the ability to produce multiple lines of text

LARGE CHARACTER PRINTERS

Designed for use on porous substrate such as cardboard boxes, trays and bags, our high resolution C SERIES plus ranges. Up to four print heads can be run from the same base.

Acknowledged as the fastest 70mm high resolution printers on the market, C series plus piezo printer has also the largest ink capacity, the widest variety of print head options and the lowest power consumption for high resolution printing.

V SERIES THERMAL TRANSFER OVER PRINTING

Innovative design to minimise waste, to keep total cost of ownership low and manage environmental impact.

- Weight reduction
- Reducing ribbon use and packaging
- No compressed air costs
- Lower power consumption

CASE CODERS AND C SERIES (Drop On Demand)

Our reliable, robust and sturdy solutions for large character printing in challenging manufacturing environment are designed to deliver high productivity and consistent quality.

Continuous uptime is prioritised guaranteed thanks to the facility to change consumables without interruption of printing, and the robust compact design, stainless steel construction equips the C series to handle the toughest production schedules and operating environment.

RANGE OF VERTICAL STRETCH WRAPPING MACHINES

Vertical stretch wrapping machine born to set higher standards have the following:

- servo controlled direct-drive pre-stretch motors
- noiseless operation with extremely reduced maintenance
- engineered to reduce maintenance & interventions
- maximum flexibility with all the pallet sizes

HORIZONTAL AUTOMATIC WRAPPING MACHINE WITH ROTATING RING

Horizontal spiral automatic wrapping machine for packaging panels, kit furniture, assembled furniture, doors, windows, pipes, extruded aluminium and other long and bulky non-palletised products.

TAPING AND CASE ERECTOR MACHINES (RANGE OF CASE SEALERS)

We have a range of case sealers all size of boxes. All types such as semi-automatic fixed and random boxes, automatic fixed format box taping and self-sealing machines are all available. The new Superbox forming machine retrieves the cardboard blanks, opens, folds and forms the boxes and then seals the bottom with tape.

ROBOBAND 2VH

Automatic end-of-line machine for the application of two parallel strips of stretch film for the stabilization of palletized loads. Automatic wrapping machine particularly suitable for applications where there is the need to ensure load stability on a pallet, but overall containment is not required.

SHRINK WRAPING MACHINES

Constant product development and research for better solutions and materials in shrink film technology led to the creation of Combitech 5845: a machine that delivers great performances and versatility.

Athena Combi offers outstanding adaptability and precision in the sealing-shrink wrapping process of a wide range of products along with a user friendly interface and the highest safety standards.

REINER

The mobile marking device jetStamp 1025 •

Made in Germany • can print up to a print height of 25 mm

The diverse print spectrum includes freely adjustable continuous 1-D and 2-D barcodes, date, time, texts, numbers or graphics, such as the IPPC logo or company logo.

THE ADVANTAGE: *This can be done with only one print cartridge.*

The desired print images can be created as standard using the "PC set graphic" software supplied.

FastPaQ TAX-STAMP APPLICATORS

Applicators that have been verified to be able to apply the tax-stamps at very high speeds and with good accuracy are provided at a heavily discounted price to support manufacturers who need to apply the tax-stamps.

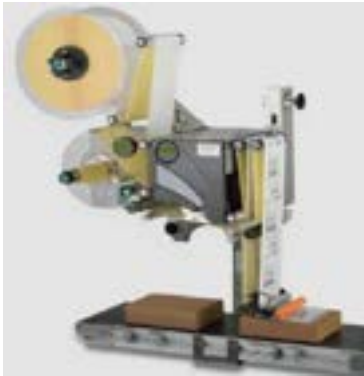

APPLICATORS

The **XLP 50x** Label Printer series is the perfect print solution for medium label volume applications, available in 4 and 6 inch print width. It can be used with thermal transfer or thermal direct technology and prints high quality barcodes, fonts, and images on a large variety of label materials: (coated) papers, PE/PP or cardboard up to 152 mm width.

PRINT & APPLY

The Print & Apply ALX Systems from NOVEXX Solutions are reliable, modern systems for any Print & Apply requirement. The ALX 73x and ALX 92x models are developed to fulfill today's high standards for product labeling and identification as well as supply chain and logistic requirements. Our Print & Apply Systems are well designed for industrial environments with high and low product volumes, 24/7 production hours or any label position.

LABELERS

NOVEXX Solutions offers a wide range of labeling systems for applying self adhesive labels of any shape and size accurately and reliably onto any product. With our ALS 2xx models, most labeling demands can be fulfilled. **When** the requirements are extreme, the ALS 30x models make sure that you achieve best-in-class labeling. High-performing, robust labelers for applying decorative, informative and branding labels

in demanding environments in continuous operation, 24 hours per day, 7 days a week. Integrated design with a small footprint makes this ALS range easy to install in your new or existing production line, regardless of whether the label has to be applied on the top, on the side, around or on the bottom of your product. Intelligent features like dispensing edge, pneumatic applicators, Ethernet, IP65, tandem function and many more make the ALS range your preferred labeler.

We are a leading operator in the food ingredients sector, developing flavouring solutions and made-to order caramels, working in close proximity with our customers and the preferences of end consumers. We place paramount importance on customer satisfaction via the quality of our products, which are designed and produced with all due care for human safety and environmental protection.

An Endless Variety Of Flavours

From traditional to more surprising flavours, our creativity knows no bounds.

Choose from the following flavour categories:

Spicy

Vanilla, cinnamon spicing blends

Dairy

Creamy, buttery cheesy

Fruity

Orchard fruits, citrus berries, exotic fruits

Indulgent

Chocolate, caramel dessert flavours

Savoury

Herbs, condiments culinary blends

ACTIVES SOLUTIONS

Consumers nowadays wish to reap the full benefits of nutritious food in their diets without having to compromise on taste. With that in mind, we have created the ACTI'SENS active solutions range which specifically solves these taste related challenges.

A range of solutions capable of significantly reducing aromatic notes and undesirable flavours of functional and enriched products. It is particularly suited to sport, senior or slimming nutrition

This range aims to improve the nutritional profile of reduced-sugar products. It makes it possible to rebalance the sweet perception of their formulation tastewise.

Our ACTI'PLUS solutions enable the use of certain raw materials in your recipes by providing a sensory added value.

FLAVOUR SOLUTIONS DESIGNER

The specialist in sweet and savoury flavour solutions for food industries

CARAMEL DESIGNER

Flavouring caramels, toppings and fillings suitable for a variety of applications

OUR CARAMELS

Choose between traditional flavours or more creative variations :

Taste profiles including Toffee, Dulce Caramels that bear your signature, developed according to your specific requirements. Original caramels with exotic, spicy or dessertde Leche and Butterscotch dessert-based flavour notes!

LIQUIFIED GAZ

INDUSTRIAL SUGAR

INDUSTRIAL SALT
